

# You're Invited to Fixed Full Arch Rehab: Chrome GuidedSMILE

## *Hands on Guided Surgery Training.*

**Saturday June 15th 2019**

Location Montreal Quebec  
Limited to 25 participants

**TIME: 8:30AM - 5PM**

**COST: \$895 + GST**

**RSVP before June 1st 2019**

### LEARNING OBJECTIVES

WHAT YOU WILL LEARN BY PARTICIPATING  
IN THIS HANDS ON TRAINING COURSE.

- ✓ Patient Selection
- ✓ Treatment Planning
- ✓ Pre surgical requirements
- ✓ Digital Smile Design
- ✓ Online Digital Surgical Planning
- ✓ Surgical Procedure
- ✓ Provisional Restorative procedure
- ✓ Final Restorative Procedure
- ✓ Marketing
- ✓ Criteria important for patient selection for full arch immediate implant loading treatment.
- ✓ Treatment workflow for full arch immediate loading treatment.

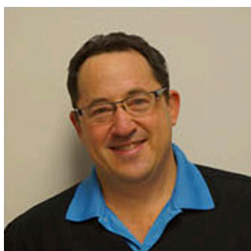

**Course Description:** This course aims to address the most common questions and complications faced in full-arch implant reconstruction. Attendees will be introduced to a protocol called GuidedCHROME, which improves surgical and restorative accuracy and efficiency using CBCT and 3D planning combined with CAD/CAM. This new protocol, combined with Dr. Mark Bishara and Mr. Larry Rips's, surgical techniques and technical experience will elevate your surgical process for full-arch treatment to a new level of accuracy and efficiency. GuidedChrome offers 2-3 hour surgery/conversion appointments and reduces the final restorative workflow by 2-5 appointments! The hands-on portion includes step-by-step surgery and implant placement on a model using the patent-pending, GuidedCHROME technique. and conversion of a pre-manufactured PMMA provisional bridge. This will be completed utilizing angled implants and multi-unit abutments, thereby preparing the clinician to incorporate these immediately into clinical practice, without the need for chairside laboratory assistance.

## Dr. Mark Bishara

Dr. Mark Bishara completed his undergraduate studies in medical biophysics, at the University of Western Ontario and was a gold medal recipient as top graduate of his program. He went on to complete his Doctor of Dental Surgery degree at the Schulich School of Medicine and Dentistry. Since graduating, he practices in the Durham region with a focus on digital workflow, dental implants, bone grafting material regeneration and tissue regeneration. He currently collaborates with members of the Miron Lab in the United States on tissue regeneration utilizing Platelet Rich Fibrin (PRF). He is a published author on PRF, immediate dental implants and clinical applications. He is the President and founder of the Canadian Implant Dentistry Network, Canada's largest online implant community. He is on the advisory board of Spectrum Implants, the only peer reviewed implant journal in Canada as the Implants Product Review Editor. Dr. Mark Bishara is an active lecturer with the Toronto Implant Academy on dental implants and is a published author on topics such as PRF treatment and dental implants.

## Larry Rips RDT

### **Guided Chrome Canada**

*Treatment and Case Planning Co-ordinator, Implant Design and Prosthetic Specialist, CAD CAM Design and Case Planning*

Larry demonstrates passion and commitment for both the creative and technical aspects of the lab. Dental Laboratory Associates benefits from his 23 years of dedication to the precision craft of emerging dental lab technologies and an absolute understanding of the importance of high customer service. Larry is one of only a few technicians that have participated in and completed a surgical mentorship program in implant dentistry. His surgical training included patient and site selection, site preparation, implant placement grafting, and final prosthetics. Larry is a past member of the faculty of the AAID Toronto TiMax implant course and now his forte is being an integral part of our client's dental team and is always available with his knowledge and expertise to assist you chair side whenever needed. Larry's passion and enthusiasm for what he does is contagious but don't disturb him while he's watching his beloved Liverpool FC.
